

1.

- a) `select nutzung from geb where nutz_ktg='o' and etagen = 1`
- b) `select str_name, zustand from str
where str_name is not null
order by str_name desc`
- c) `select concat(concat(vorname,' '),name) as vorname_name
from eigentuemer
where anrede = 'H' and geb_name is not null`
- d) `select flaeche*bodenw as ertragsmesszahl
from flst
where flaeche*bodenw is not null
order by ertragsmesszahl desc`
- e) `select count(*) as flurstueck_anzahl
from flst
where gemar_s = '8705' and flaeche > 5000`
- f) `select concat(concat(vorname,' '),name) as vorname_name
from eigentuemer
where upper(name) like 'W%' and str = 'Waltersdorfer Str.'`

2.

```
update eigentuemer  
set aka_grad='Dr. phil.'  
where lower(name) = 'wunderlich' and  
lower(vorname) = 'fabius' and  
rownum = 1
```

3.

```
insert into str  
values ('99997','000014286120','Neue Siedlung','gut','5101')  
  
insert into str  
values ('99996','000014286120','Am Kirchberg','ausgebaut','5101')  
  
select * from str  
where str_kz in ('99997','99996')
```

4.

```
select * from eigentuemer  
where geb_datum > CURRENT_DATE  
  
delete from eigentuemer  
where geb_datum > CURRENT_DATE
```

5.

```
alter table sonstige_geometrie  
add (x number(10,3), y number(10,3))
```
